

# Gemini Marine Canvas & Marine Products

*Custom canvas • DrillSteady • Gemlock struts & hinges*

Simply elegant. Simply effective. Simply better.

## Hello Europe!

*Gemini Marine Products sizes now in metric for easier shopping wherever you are*

Rockland, Maine, USA – 6 February 2020

Gemini Marine Products offers ocean-rugged 316L stainless steel mounting hardware and patented articulated hinges and folding struts for creating exceptional boat canvas that is both simple to deploy and a real improvement on the way canvas frames used to be built.

Demand for our innovative products is growing, especially for solar panel installations.\* While some of our products are manufactured in metric measures, our US-based business has always been marketed in inches.

**We know that shoppers in the rest of the world expect metric measurements, so we're happy to announce that we've now added this information across the board in our business – not only here on NauticExpo, but also on our website and online store.**

Now no matter how you find us, you'll find the metric measurements you need and understand.

Where our products (like our hinges) are manufactured in metric, we'll include this information.

Other items are designed to use with different sizes of stainless steel or aluminium tubing, so from now on we'll also include the metric equivalent size tubing used in Europe and beyond.

We know that once you can more easily see which Gemini Marine Products you need for your boat, you will be impressed by their quality, value and adaptability.

Thank you for considering Gemini Marine Products. Feel free to contact us with your questions or suggestions, and happy shopping.

\*Please contact us if you are interested in joining our growing group of distribution partners. We'd love to talk to you. We offer generous discounts for chandleries, fabricators, canvas shops and other businesses who use and resell our products.

*Quality and service since 1994*
